Since the beginning of Rough Sets lot of papers have been published. This page is meant to give you some idea and make search for appropriate reference easier. It contains reference to publication database , educational material, software , and lists of relevant publications collected by different persons .The Rough Set Database System

The Rough Set Database System (RSDS) is an online service making it possible to browse and search the database of bibliographic data about publications related to the area of Rough Sets.

The database is expanding and stands a good chance to become THE source for Rough Set bibliographical information.<http://rsds.univ.rzeszow.pl>Guides, tutorials etc.

- A. Skowron, N. Zhong. Slides for the tutorial presented at PAKDD 2000
- R. SBowiDski, S. Greco, B. Matarazzo. Rough Set Analysis of Preference-Ordered Data - Slides for the lecture presented at RSCTC 2002 Software
- RSES - Rough Set Exploration System - <http://logic.mimuw.edu.pl/~rses>
- Infobright Community Edition - <http://www.infobright.org>

Lists of publications

Reference lists are provided in different formats. Compressed (zipped) versions are also available to make download faster.
